

## Chevron Conveyor Belt

On the surface of the belt, there is chevron cleats higher than the belt body. The cleat may be either open – end or closed. Each kind of cleat includes three types, high, medium, and low. It can convey powdered, granulated and small lump materials at the inclination of no more than 40°, it can also convey packaged materials. Chevron conveyor belt is composed of belt carcass and pattern. The shape and height (depth) of cleat is subject to the material it conveys and the angle of the machine.

Incline Belt (C15 Type)		
A Belt Width	B Cleat Width	C Pitch
500	385	250
600	385	250
650	385	250
650	385	250
750	600	370
900	600	370
1,000	600	370

(Unit:mm)

Incline Belt (C25 Type)		
A Belt Width	B Cleat Width	C Pitch
650	550	250
650	550	250
750	550	250
800	550	250
900	750	330
1,000	750	330
1,050	750	330
1,200	750	330
